HTML & CSS Practical Assignment

Employee Management System (5 Questions)

Objective

Design basic UI components of an Employee Management System using **HTML & CSS only**.

Question 1: Create Employee Dashboard Page

Create a webpage (`index.html`) that includes:

- Header with:
  - Company Name (e.g., *EMS Portal*)
- Sidebar with menu:
  - Dashboard
  - Employees
  - Add Employee
- Main section with **3 cards**:
  - Total Employees
  - Active Employees
  - On Leave

Question 2: Design Employee Table

Create a page (`employees.html`) with a table:

Columns:

- Employee ID
- Name
- Department
- Email
- Status

Styling requirements:

- Alternate row colors (zebra striping)
- Hover effect on rows
- Styled header background

Question 3: Create Add Employee Form

Create a form (`add-employee.html`) with:

Fields:

- Full Name (text)
- Email (email)
- Phone (number)
- Department (dropdown)
- Gender (radio buttons)
- Skills (checkboxes)
- Submit button

Style the form with:

- Proper spacing
- Rounded input fields
- Focus effect

Question 4: Create Employee Profile Card

Design a **profile card UI** using HTML & CSS:

Include:

- Profile Image
- Employee Name
- Job Role
- Email
- Contact Button

Add:

- Box shadow
- Hover effect
- Center alignment

Question 5: Responsive Layout

Make any one page (Dashboard / Table / Form) **responsive**:

Requirements:

- Mobile view (max-width: 768px)
- Stack layout vertically
- Adjust font sizes and spacing

Submission Guidelines

- Use **external CSS file**
- Clean and readable code
- Proper indentation
- All pages should be linked
